ARTP300-SE INTEGRATED AMPLIFIER

Inheriting the know how of its developer and taking advantage of the most recent technical innovations, the new 2 x 140 W at 8 Ohms and 30W in Class A, ART 300 SE integrated amplifier invites you to musical pureness and enjoyment.

www.artec-france.com

The new ART 300-SE amplifier has been designed with an hybrid layout which combines the best of solid state and tube technologies achieve an unequaled level of dynamics, transparency, flexibility, spatial restitution and sound dimensions without any compromise

Technical specifications :

Type : Power stereo amplifier

Nominal power :

2x140W @ 8Ohms

2x240W @ 4Ohms

Classe A : up to 30W

Dual power supply : R-Core 800VA

Bandwidth : 20Hz à 50kHz

Harmonic Distortion : <0.01% @ 1W

Signal-to-Noise ratio : >112dB

Time rise : <3μs

Damping factor :

external adjustment 25 to 120

Input stage to single-ended tubes

Output stage Mosfet and Bipolaire

No total feedback

Inputs :

1 RCA / 47KOhms

1 XLR / 22KOhms

Dimensions :

483mm x 450mm x 170mm

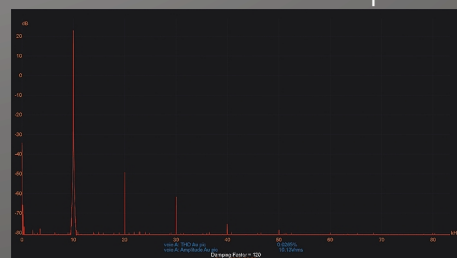

Weight :

26kg

The new ART 300-SE amplifier input and output stages are developing an innovative layout based on the use of two "gold" teflon supported tubes for the first stage and an original combination of mosfet and bipolar transistors for the second stage.

The damping factor adjustable to completely fit with the specific needs of the loudspeaker drastically improves its sound performances
